FOR IMMEDIATE RELEASE:

## US FLIGHT ACADEMY RECEIVES SELF EXAMINATION AUTHORITY

Denton, TX – The FAA has granted the US Flight Academy the rare right to Self Examination for their Part 141 training programs. As of May 1, 2009 the flight school is authorized to issue licenses and pilot upgrades without relying on the services of a Designated Pilot Examiner. The Self Examination award is due in part to the 95 percent written and check ride pass rate that the Academy had established.

All oral exams and flight check rides will be handled by US Flight Academy staff. Written exams will be handled by their CATS testing facility. This will expedite the licensing and additional ratings process, which has a significant bearing on large volume of students at the flight school.

US Flight Academy offers a professional pilot program that will take students from their first flying lesson up to the ATP rating. The Academy is in the process of taking on nearly 200 Chinese students, who will become part of the Chinese airline industry. They also provide training to a high number of students from India, as well as a wide range of local, regional and national applicants.
